PROJECTS

iNotes
- A feature-rich note-taking app designed with a user-friendly interface.
- iNotes allows users to:
  - Create, edit, and delete notes with customizable colors for better organization.
  - Mark notes as favorites for quick access to important items.
  - Synchronize notes with Firebase, ensuring data is securely stored and easily retrievable.
  - Intuitive color picker for note customization, with real-time updates to the cloud.
  - Implements user authentication with Firebase to maintain personalized user sessions.
- This project demonstrates expertise in Flutter development, Firebase integration, and creating intuitive user experiences.

iQuotes
- A sleek quote-fetching app that integrates with a custom-built API hosted on GitHub. Key features include:
  - Fetching and displaying quotes in real-time through seamless API integration.
  - API developed independently to manage and serve quotes, showcasing backend and API development skills.
  - Focus on creating a clean, responsive, and intuitive user interface.
- This project demonstrates expertise in API design, backend integration, and frontend development in App Development Background

ADDITIONAL INFORMATION

- **Certifications:** AICTE Embedded Software Engineering Certified
- **Extra Activity:** Google Arcade Facilitator Participant | Google Gen Ai Programe Participant
- **Hackathon**: SSIP StarUp Hackathon, ODOO x Charusat , SBI Hack-Ai-Thon
